

akatherm HDPE Soil & Waste System

Aim higher

FACT

Trend towards prefabrication

In most countries the labour costs are becoming an increasing part of the total installed cost of a project. To keep these costs at a minimum all major builders are steering towards prefabrication and modular design.

FACT

Evermore durable

Total cost of ownership is the name of the game. When translating this to installed systems, it means durable and quality materials that are proven to be low maintenance, now and in the future.

FACT

Complex modular designs

While building plans can take several years to develop because of large and complex designs, the building itself takes up less and less time. This requires modular design and smart use of materials on site.

Driven by durability

Modern building designs present evermore extreme challenges. Today, whether a consultant or installer, you need soil & waste solutions capable of responding to the commercial challenges faced by your clients' and end users' businesses. The drive for more:

Durability

Akatherm HDPE soil & waste systems are made from polyethylene, a durable material with a very long lifetime.

Low cost of ownership

Easy prefabrication and installation with secure joints all work together to keep the total cost of ownership at a minimum.

Security and flexibility

Akatherm HDPE soil & waste systems can be poured into concrete, embedded in the ground or hung from the ceiling and still sustain and perform.

These particular challenges can only be overcome by a specialist drainage solution. Akatherm helps you meet these demands with confidence.

Akatherm offers more than just a soil & waste system. Like every specialist drainage solution from Akatherm, it comes with a comprehensive level of support.

All our systems are backed by dedicated software, full training and unique products, plus the service standards you would expect from high performance drainage experts and the worldwide backing of the Aliaxis group.

Decisive advantages of Akatherm HDPE

High Density Polyethylene is an exceptionally flexible and tough material, highly resistant to mechanical stress and impact even at low temperatures.

Akatherm HDPE has a complete product range consisting of pipes and fittings from 40 mm to 315 mm. It includes a wide range of branches, bends, traps, sanitary and connection fittings.

HDPE is a light weight system with simple and secure jointing techniques like electrofusion. It is a fully closed system with homogenous joints. Cost saving prefabrication is possible even in large sizes.

Be smarter

Akatherm HDPE has a high temperature and chemical resistance which makes it ideal for drainage in residential housing, commercial kitchens and laundries. It is flexible and tough for installation underground and embedded in concrete. Its closed system is perfect for trade waste applications like industrial and laboratory fluids where system integrity and secure homogenous connections are critical.

Chemical resistant

Elastic

Hot water resistant

Impact-resistant and tough

Quality and certification

Akatherm HDPE is developed and manufactured within an ISO 9001 Quality Assurance system and complies with the EN 1519 and other relevant international standards as well as meeting numerous national approved quality and safety standards.

Jointing technology

Akatherm HDPE offers a choice of welded and mechanical jointing techniques. Welded joints provide a homogenous joint ideal for ceiling voids, vertical stacks and underground pipework. Mechanical joints offer adjustability, flexibility and the option to demount.

Mechanical joints

- Plug-in joint
- Snap joint
- Screw-thread joint
- Flanged joint
- Contraction sleeve
- Sleeve coupling
- Metal coupling
- Rubber collar joint

Welded joints

- Butt-weld joint
- Electrofusion joint

Butt-welding homogeneously joints HDPE pipes and fittings into prefabricated sections without using additional connection fittings.

*Suited for
efficient joints and
prefabrication*

*Suited for on-site
joints in tight areas*

Electrofusion is a rapid and simple way of permanently jointing individual pipes and fittings or prefabricated pipe sections in tight places.

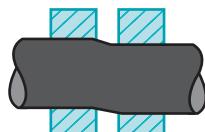

Think it. Build it.

Simple, secure & fast

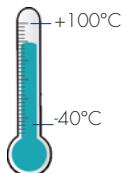

+ Material advantages

Impact-resistant and tough:
Unbreakable at temperatures
above 5°C

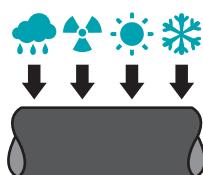

Elastic and flexible:
Adjusts to local ground movement
for underground use

Thermal resistant:
Applications possible between
-40°C and 100°C

Chemical resistant:
Suitable for transport of polluted
waste water

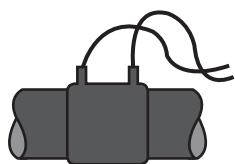

UV & weather resistant:
Unrestricted outside use through
carbon black additives

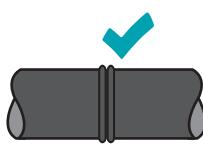

Wear resistant:
Lower cost due to long lifetime

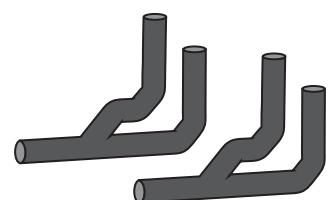

+ System advantages

Welded system:
Simple and secure installation
using butt-welding and electrofusion

Homogeneous welded joints:
Pull tight and leak proof for a
completely closed system

Prefabrication:
Fast and cost-saving installation
of repetitive systems

Light in weight:
Cost saving in transport and
handling

Low heat conductivity:
No condensation insulation required
during short periods of cooling

Non-toxic:
100% recyclable and environ-
mental friendly

Aim higher

Because skyscrapers are designed evermore extreme, a single stack soil & waste system offers you the possibility to aim higher. End users gain more useable space inside the building because the vent pipe is obsolete. Architects can create extreme building shapes and go 'sky high' because the unique aspects offer several flexible connection possibilities. Material and installation costs are reduced through low weight, the vent pipe being obsolete and prefabricated pipe segments.

**Complete product range
including a wide range of
branches, bends, traps,
sanitary and connection
fittings in conformity
with EN1519**

**Single stack system with an
Akavent aerator for vertical
installation in high-rise buildings**

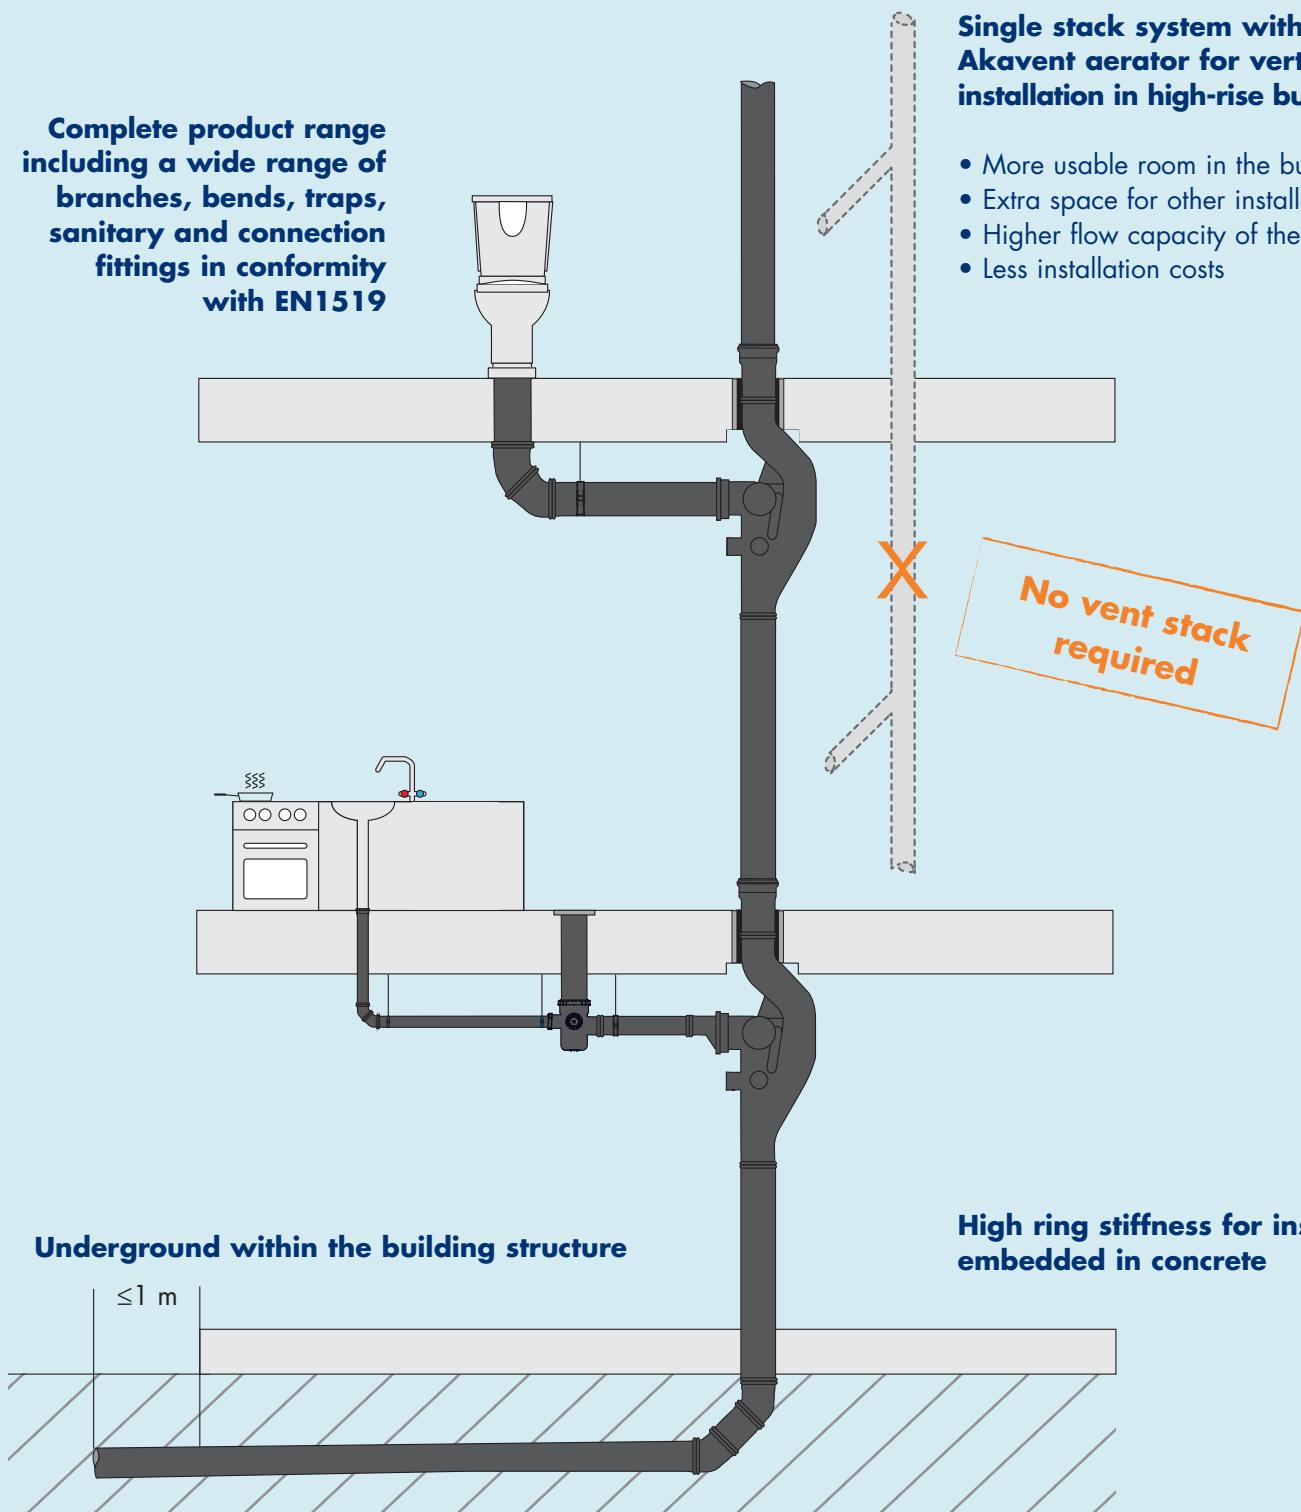

- More usable room in the building
- Extra space for other installations
- Higher flow capacity of the stack
- Less installation costs

**No vent stack
required**

Underground within the building structure

**High ring stiffness for installation
embedded in concrete**
